

DigiLEAN

.tools

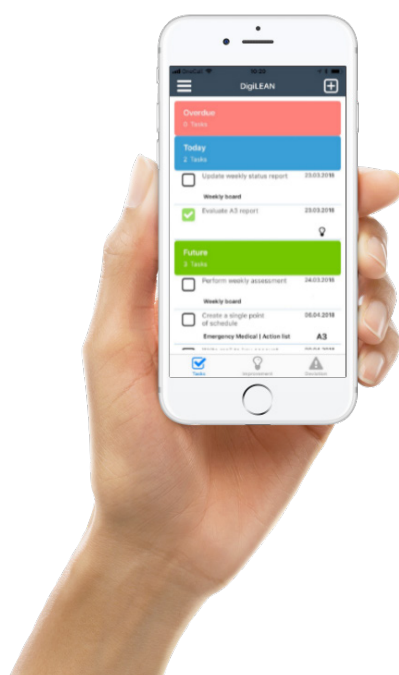

Holistic and functional

DigiLEAN.tools provides a complete solution for your continuous improvement process. The platform is based on simple principles and the goal is to inform, motivate and engage users. This is accomplished by a user friendly and intuitive user interface with useful and inspiring functionality.

DigiLEAN.tools is web based and available on all devices. Drag and drop functionality and touch support makes the solution efficient and simple to use.

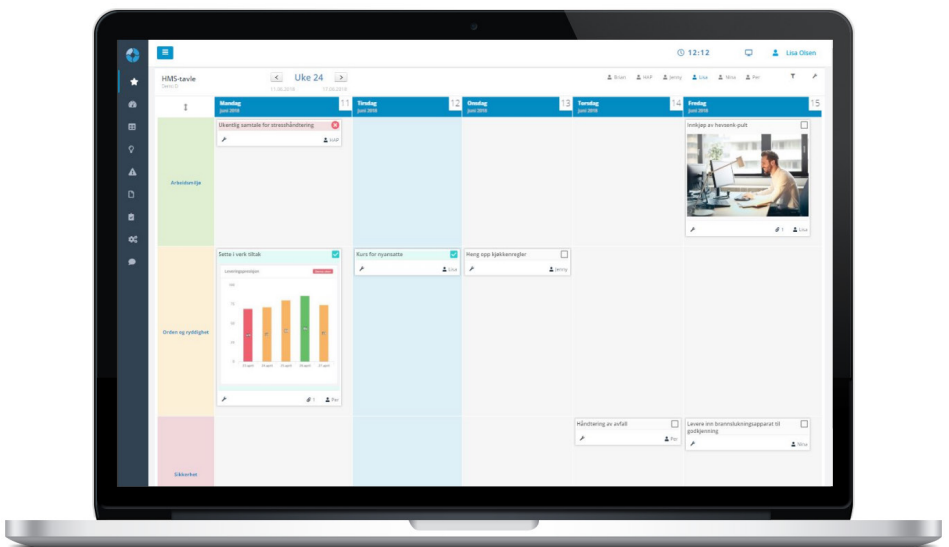

The focus is on the user and it's easy to find information relevant for each user. As the picture on the right demonstrates, the DigiLEAN app lists all your personal tasks.

Simple and effective overview

Boards gives a good overview and is an effective way to communicate and collaborate. Digital boards in DigILEAN.tools have several advantages:

- User can access up-to-date boards from anywhere
- New boards are easily configured
- Task assignment to ensure responsibility
- Visual presentation. Both boards and tasks can be coloured and present pictures.
- Powerful. Tasks can be copied, cloned and repeated.
- Filter tasks easily.

Creates engagement

To increase the user engagement, it's possible to comment and "like" improvement suggestions. The user can track the status of their own improvement suggestions. The time for forgotten notes in a suggestion box belongs to the past.

The "Daily feed" will provide the user continuous updates of what's going on in DigiLEAN.tools or other places.

ACHIEVEMENTS:

- Engaged employees
- One complete system for improvements
- Makes information available
- Enhance the culture for collaboration and sharing
- Simpler workdays

The screenshot displays a user interface for DigiLEAN.tools, featuring several overlapping cards representing different project stages and suggestions.

- My incidents:** A card with a warning icon and a "New incident" button. It lists a "Missed milestone" by Lisa Olsen, last modified 12.06.2018.
- My A3s:** A card with a document icon and a "New A3" button. It shows a project titled "R&D can't deliver what sales has promised" by Lisa Olsen, last modified 12.06.2018. The card includes a progress indicator (a circle with a teal segment), a "Show actions" button, and a summary of 2 checked items, 0 red items, and 2 white items.
- My suggestions:** A card with a lightbulb icon and a "New suggestion" button. It lists three suggestions:
 - Suggested:** "Oppdatere hjemmesidene med nye kundereferanser" by demo@digilean.tools, last modified 12.06.2018. It has 2 likes.
 - Planned:** "Fotballturnering for alle klassetrinn" by demo@digilean.tools, last modified 12.06.2018. It has 1 like.
 - Implemented:** "Oppdatere møteregler for Stv" by demo@digilean.tools, last modified 12.06.2018. It has 1 like.

Modules

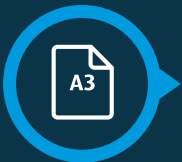

Boards Replace your manual boards with a digital whiteboard. A collaboration tool providing overview and systematic work processes. Status and targets are easily configured to suit the organization, team or each user. Visualize your KPIs using traffic light, bar graphs or other charts. The metrics source can be Digilean.tools or the company's own business systems.

Excellent collaboration across different locations. Supports status updates, task assignment and moving tasks using drag and drop.

Improvement A module with complete overview of all improvement suggestions, easy sorting, prioritization and processing. Automatically generated statistics for full control of the improvement efforts.

A3 Flexible, structured and cooperative problem-solving method. Design custom A3 templates with unique steps and PDF-configuration. Real time action list prevents action items are forgotten.

Project A visual project management tool where you decide your important focus areas. Improvement, incident and A3 status are automatically updated. An excellent management tool to get your team to pull in the same direction.

Incident Report an incident, process incidents with corrective actions and provide live up-to-date overview of affected areas. The reports has great value for both the internal quality responsible as well as supervisory authorities.

Learning Centre Become a learning organization. Access courses and articles from Lean-guru Bjarne Berg Wig. Use the arena to exchange experience internally and build your own competency area. Interactive and collaborative content.
