

# DigiLEAN

ONLINE TOOL PLATFORM BUILT FOR LEAN  
AND CONTINUOUS IMPROVEMENT

# Holistic and functional

---

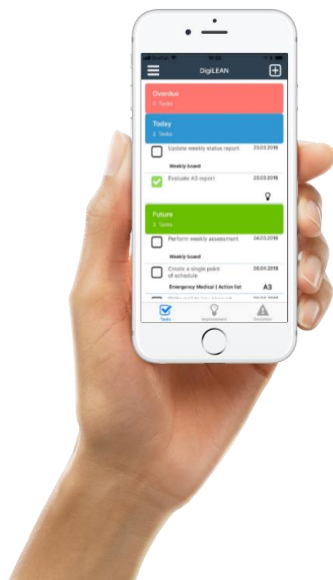

DigiLEAN provides a complete solution for your continuous improvement process. Unleash your improvement potential by engaging your employees, identify and prioritize the most valuable improvements.

This is accomplished by a user friendly and intuitive user interface with useful and inspiring functionality.

DigiLEAN is web based and available on all devices. Drag and drop functionality and touch support makes the solution efficient and simple to use.

The content is based on users and groups. You will always find information relevant for you.

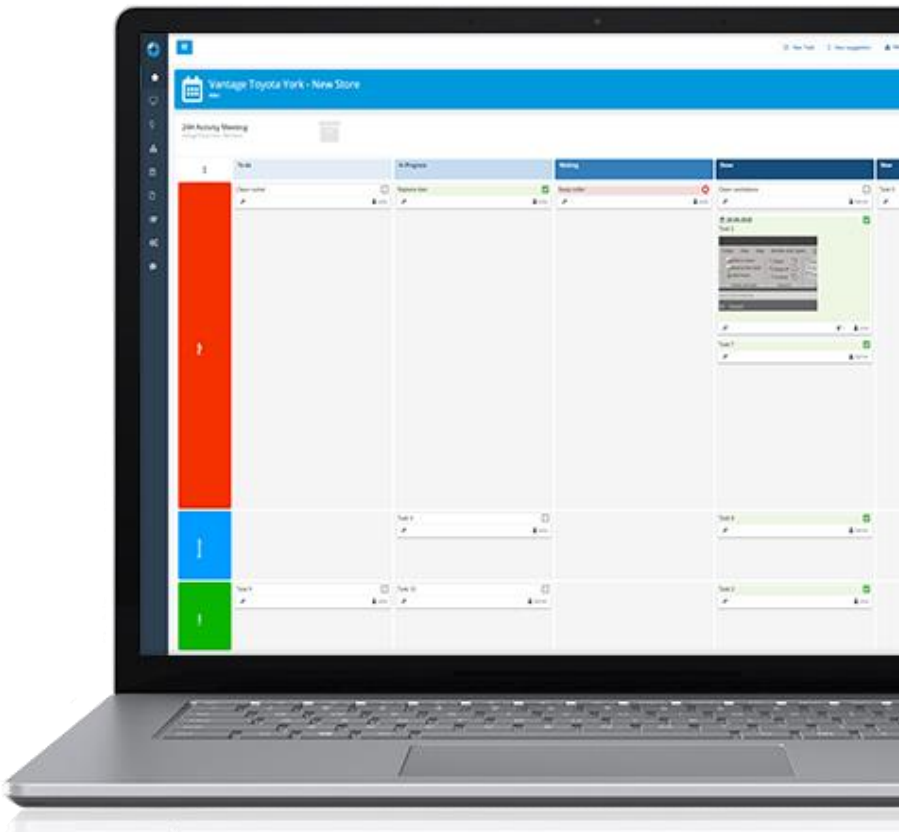

# Simple and effective overview

---

Combine key performance indicators and action lists on boards to create a better workflow. Digital boards in DigiLEAN have several advantages:

- Access boards from anywhere
- Always to-to-date
- New boards are easily configured
- Task assignment and due dates
- Large selection of visualization apps
- Flexible and functional task management across boards

# Create engagement

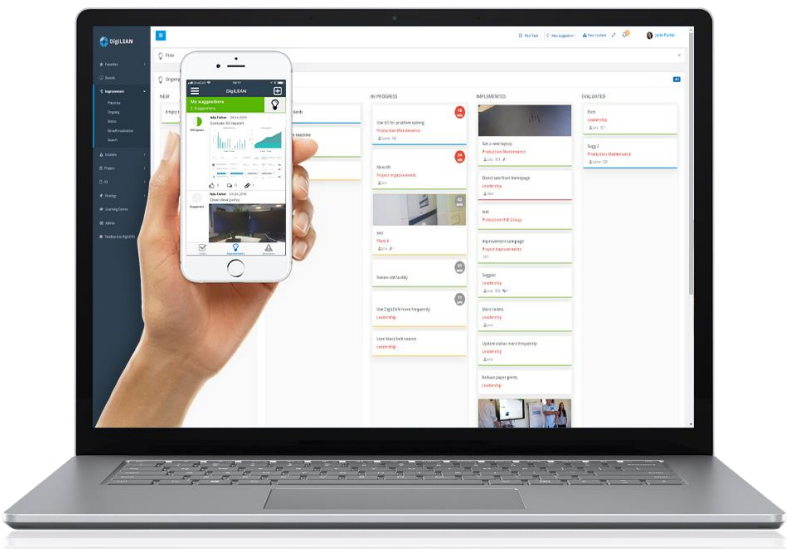

---

Add transparency to your daily operations. Like and comment on improvement suggestions. Prioritize and implement the most valuable improvements.

Each employee can track the status of their own suggestions. Adding transparency and giving automatic feedback improves employee satisfaction.

## ACHIEVEMENTS:

- Engaged employees
- One complete system for improvements
- Makes information available
- Enhance the culture for collaboration and sharing
- Simpler workdays

**DigiLEAN**

# Modules

---

**Boards** Digitize your manual boards. Collaborate with better standards. Status and targets are easily configured to suit the organization, team or each user.

Visualize your KPIs using traffic light, bar graphs or other charts. The metrics source can be DigiLEAN or the company's own business systems.

Excellent collaboration across different locations. Supports status updates, task assignment and moving tasks using drag and drop.

**Improvement** A module with complete overview of all improvement suggestions, easy sorting, prioritization and processing. Automatically generated statistics for full control of the improvement efforts.

**Incident** Report an incident, process incidents with corrective actions and provide live up-to-date overview of affected areas. The reports have great value for both the internal quality responsible as well as supervisory authorities.

**A3** Flexible, structured and cooperative problem-solving method. Design custom A3 templates with unique steps and PDF-configuration. Real time action list prevents action items are forgotten.

**Project** A visual project management tool where you decide your important focus areas. Improvement, incident and A3 status are automatically updated. An excellent management tool to get your team to pull in the same direction.

**Learning Centre** Become a learning organization. Access courses and articles from Lean-guru Bjarne Berg Wig. Use the arena to exchange experience internally and build your own competency area. Interactive and collaborative content.
